EDUCATION

Brown University

Providence, RI | Expected Graduation: May 2026

Sc.B. in Computer Science | GPA: 3.7

WORK EXPERIENCE

Meta

May 2025 – Aug 2025

Software Engineering Intern | Bellevue, WA

- Engineered an internal React-based tool to help Meta data engineers visualize and explore data.
- Designed and implemented a GraphQL endpoint to offload data transformation to the backend, improving data-fetching performance by over 50%.
- Collaborated across multiple product teams to iterate on the tool's functionality and UX.

Brown University, Computer Science Department

Aug 2023 – Dec 2024

Undergraduate Teaching Assistant | Providence, RI

- Assist students during office hours, covering topics like polymorphism, data structures, and program design.
- Contribute to the development and implementation of course content, actively participating in the creation of engaging labs and lectures.
- Co-teach 15+ student lab sections, emphasizing socially responsible computing.

TECHNICAL PROJECTS

Cloud Gate (Bean)

Nov 2024 – Dec 2024

Brown University

- Implemented a raytracer in C++ with texture mapping, motion blur, soft shadows, and Phong lighting.
- Recreated a scene of the Chicago Cloud Gate, rendering over 150 frames to create a demo video.

CNN-Based DNA Sequence Classification

Apr 2024 – May 2024

Brown University

- Developed a CNN-based classifier using Python to identify exon/intron boundaries in DNA sequences.
- Processed 3000+ sequences, achieving over 90% accuracy through hyperparameter optimization.

QueueSmart

Nov 2023 – Dec 2023

Brown University

- Led a team to build a full-stack web application enhancing the workflow for teaching assistants.
- Utilized React with Typescript to create a user-friendly interface with real-time data updates.
- Integrated Firestore database with backend analytics, enabling dynamic data synchronization.
- Built a backend API in Java for user data analytics.

hotspots

Jan 2023

Hack@Brown 2023

- Developed a rideshare cost-sharing application mockup using Adobe XD within 24 hours.
- Awarded the Wolfram Award for innovation among 62 submissions.

TECHNICAL SKILLS

- Languages:** Java, Python, C++, C, TypeScript, R, HTML, CSS, Hack, GraphQL
- Tools:** GitHub, Unity, IntelliJ, VSCode, TensorFlow, PyTorch, React
